Investor Presentation

Forging the
GREEN FUTURE of Mobility

Disclaimers

The information contained in this confidential document ("Presentation") has been prepared by SuperAlloy Industrial Company Ltd. (the "Company"). It has not been fully verified and is subject to material updating, revision and further amendment.

While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers gives, has given or has authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision or supplement thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as "Information") and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers takes any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness or injury of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation or the information.

Neither the issue of this Presentation nor any part of its contents is to be taken as any form of commitment on the part of the Company to proceed with any transaction and the right is reserved by the Company to terminate any discussions or negotiations with any prospective investors. In no circumstances will the Company be responsible for any costs, losses or expenses incurred in connection with any appraisal or investigation of the Company. In furnishing this Presentation, the Company does not undertake or agree to any obligation to provide the recipient with access to any additional information or to update this Presentation or to correct any inaccuracies in, or omissions from, this Presentation which may become apparent.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumptions and each recipient should satisfy itself in relation to such matters.

This Presentation includes certain statements that may be deemed "forward-looking statements". All statements in this discussion, other than statements of historical facts, that address future activities and events or developments that the Company expects, are forward-looking statements. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, continued availability of capital and financing, general economic, market or business conditions and other unforeseen events. Prospective Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in forward-looking statements.

Improving Operating Margin

Shipping costs are back to pre-pandemic levels and operating margin has significantly improved. We aim to maintain double-digit operating margin.

The Fluctuation of the US dollar and Aluminum Prices

Reducing US dollar holdings has minimized the impact of exchange rate fluctuations on non-operating gains and losses. We are implementing a natural-hedge strategy.

2023 Income Currency Mix

- A 1% fluctuation in the US dollar exchange rate results in a 0.35% impact on gross profit.
- The fluctuation in aluminum price can be passed on to customers, with a relatively minor long-term impact on gross profit.

Our Long-term Dividend Policy

SAI

We aim to distribute a minimum of **NT\$2** cash dividend per share annually with a minimum dividend payout ratio of **50%**.

Robust Order Momentum With Visibility Extending To 2030

The growth of the luxury car market and the expanding adoption of aluminum components in electric vehicles will benefit our sustained growth and maintain our industry-leading position.

MOVING INTO
GREEN

- According to IMARC's market research, the global luxury car market is projected to reach **US\$565.6 billion by 2028, with a 2023-28 CAGR of 4.9%**. As the demand for luxury cars worldwide continues to rise, there will be an increased demand for aluminum forged wheels that offer high performance and superior driving quality.
- In 2023, new orders from electric vehicles **doubled** compared to 2022.
- Components dedicated to electric vehicles, such as battery enclosures, motor casings, inverter casings, BMS enclosures, etc., will also expand the use of aluminum to offset weight increases. Mid-sized and large sedans, SUVs, and sports cars utilize more aluminum components than standard models for lightweight design while maintaining safety and handling.
- We're negotiating with customers requesting recycled aluminum and we anticipate that more international automotive manufacturers will adopt our recycled aluminum solution.

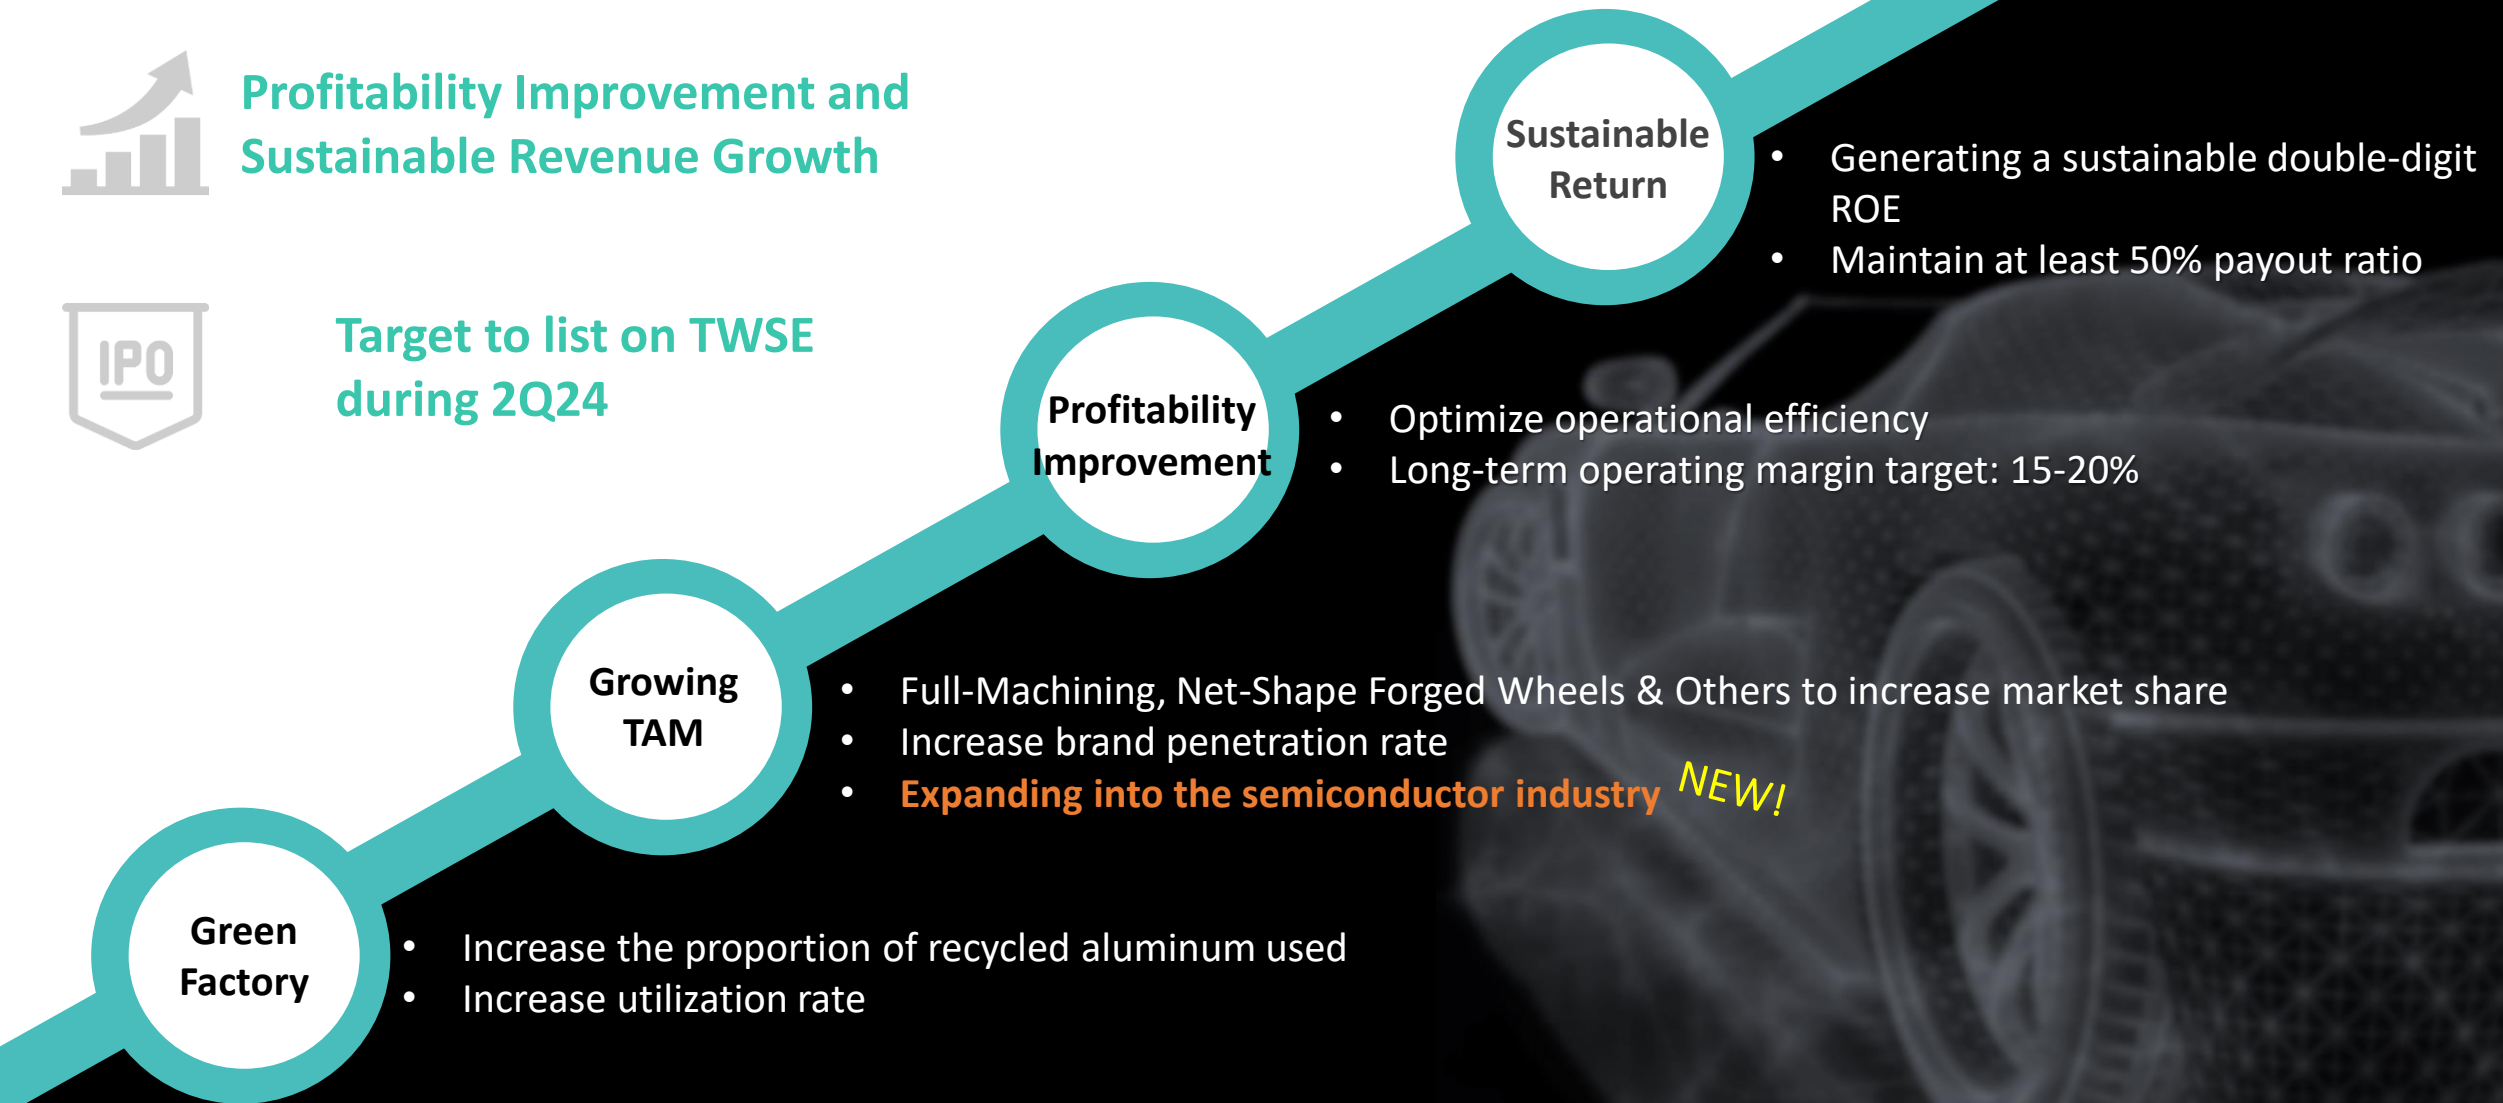

Sustainable Operation and Growth

Profitability Improvement and Sustainable Revenue Growth

Target to list on TWSE during 2Q24

Company Introduction

SuperAlloy Industrial (SAI) Is The Top Investment Choice In Tier-1 Supplier of Mobility Industry

SAI's Triple-Arrow Strategy to maximize sustainable profitability and shareholder return

01

Reinforce the
Leading Position
in the Global
Luxury/Premium
Car
Forging Industry

02

Enhance Operational Efficiency
and Profitability

2-1

Expand Net Shape
Forged Aluminum
Wheels

2-2

Green Economy
Recycled Aluminum

03

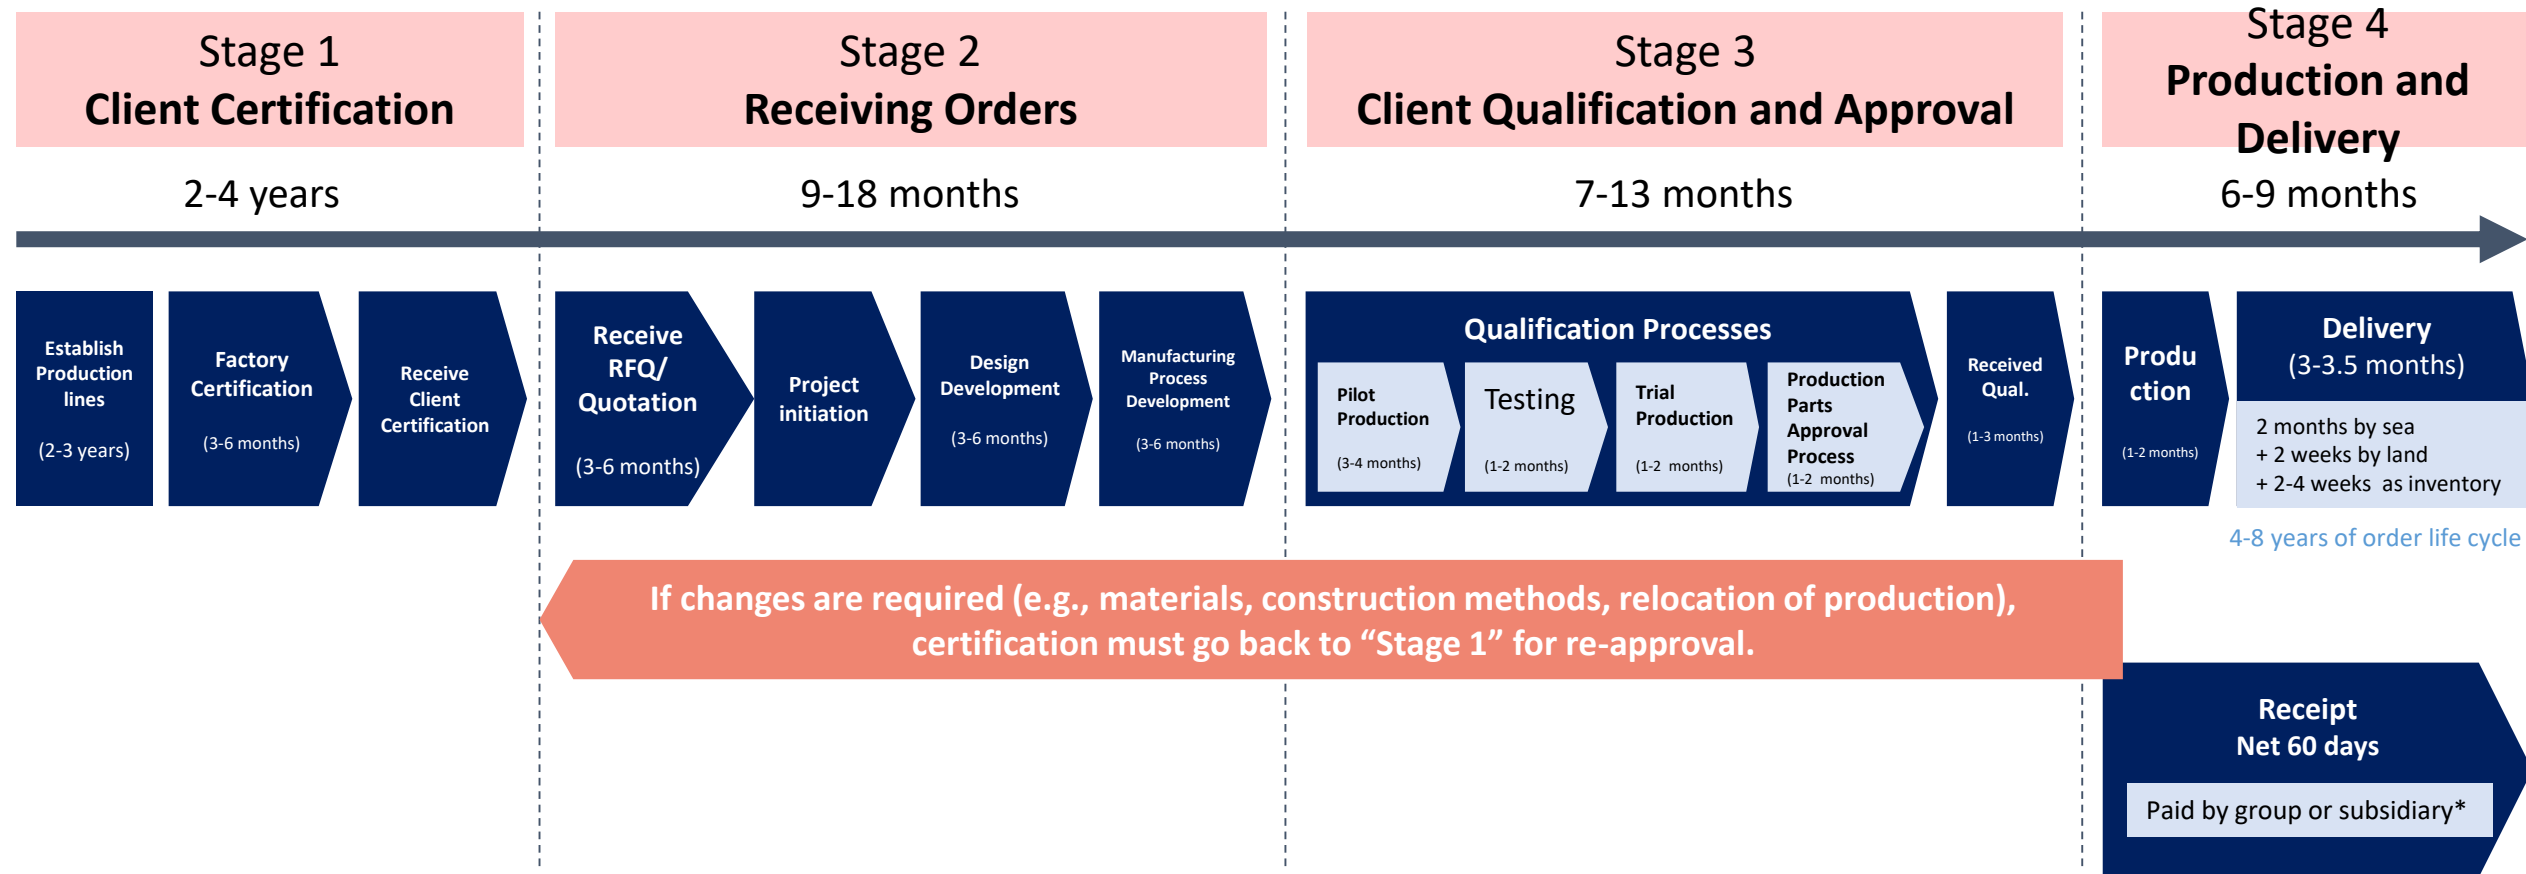

Sustainability
And
Corporate
Governance

A red Ferrari sports car is shown from a side profile, parked on a racetrack. The background features a sunset sky with orange and yellow clouds, and distant mountains. The car has a black roof and silver wheels with a yellow Ferrari logo in the center. A semi-transparent blue box is overlaid on the lower left side of the image, containing the text "01 Reinforce SAI's Leading Position".

01 Reinforce SAI's Leading Position

The High-Entry Barrier of Automotive Supply Chain

Strict Certification Is The Foundation of Strong Partnership With Clients

*Note: Some customers place orders, receive goods or make payments on behalf of the group. For example, Mercedes-AMG GmbH is the client and Mercedes Benz Group AG pays the bill.

Tier-One Supplier For Top Global Brands

SAI

SAI is the world's top 1 aluminum forged wheel maker for Premium / Luxury cars.
We will continue to develop various projects to enhance customer penetration rate.

Top 5 Clients: Lexus(Toyota) 、JLR 、 Porsche 、 BMW and Mercedes-Benz

SAI Realizes Product Design Through a Thousand Trials

With nearly three decades of experience and collaborations with international brands, we have accumulated a wealth of craftsmanship.

Since 2000, we've produced **2,225** wheel models, with a cumulative sales volume of **12** million units.

315 wheel models are in development

Made in Taiwan For the Global Market

The clientele for Premium/luxury cars spans across regions such as Europe, the Americas, and Japan.

Global footprint and revenue distribution

The Forged Wheels continue to drive upward sales for Global Premium/luxury car manufacturers

Forged wheel performs better than cast wheel in various indicators. It can also highlight the status and taste of the car owner.

Forged Wheel	Indicator		Cast Wheel
★★★★★	Strength		★★★
★★★★★	Durability		★★
★★★★★	Elongation		★★
★★★★★	Impact Resistance		★★★
★★★★★	Fuel Economic		★★★
★★★★★	Unsprung Weight		★★★
★★★★★	Vehicle Handling		★★★
★★	Price		★★★★

Wheel Size	Forged Wheel	Cast Wheel	Weight Reduction Ratio
19x9.5	11.77kg	15.70kg	-25%
20x11	13.01kg	18.08kg	-28%
21x10	14.91kg	21.30kg	-30%

Source: SAI Lab. Differences in weight are also influenced by design and load restrictions. The tested wheels are of a similar design and size.

SAI Supplies 32 EV Models (9 BEV : 23 PHEV)

Forged aluminum wheels can simultaneously meet the high torque acceleration, lightweight, handling and safety requirements of electric vehicles

Porsche Taycan 2 design models (2019-now)

Jaguar I-Pace (2018-now)

BMW i8

Tesla Model X (2015-2018)

Tesla Roadster (2008-2012)

McLaren Artura

Ferrari Stradale

Joining hands with SAI to pioneer a new category of automobiles: Ultra-Luxury Electric Super Coupé

SAI

A rear view of an orange Jaguar F-Pace driving on a winding road through a hilly landscape. The car is in motion, with a blurred background. The license plate is 589 SCC. The Jaguar logo and 'F-PACE' badge are visible on the rear. A semi-transparent grey box is overlaid on the bottom left of the image.

02 Enhance Operational Efficiency and Profitability

SAI Aims to Deliver Sustainable Long-term Shareholders Returns through the Enhancement of Operational Efficiency and Profitability

Long-term operational goals :
15-20% Operating Margin
Double-Digit ROE

2-1 Improve Operational Efficiency through Expanding Net Shape Forged Wheels

Advantages of Net Shape Forged Wheels

- ◆ Our Net Shape Forged Wheels utilize precision forging to shorten post-forging processes, simplify the production process, which leading to less production time and lower cost.
- ◆ It is suitable for bulk orders of premium car brands, which increases our utilization rate and higher asset turnover.

	Fully-Machined Forging	Net & Near Net Shape Forging
Rim type	Super and luxury car (i.e.: Ferrari, McLaren, Rolls Royce, Bentley)	Premium car (i.e.: BMW, Mercedes-Benz, Porsche, Lexus)
Forging process	Shorter, cheaper and less exact mold	More exact mold with higher tooling costs
CNC machining time	Longest and requires the most plant floor area for CNC machines	Reduced need for machining
Design process	High machining complexity and long toolpath design time	Three passes of forging, and the mold flow analysis time is long
Material costs	High	Less
Advantages	Enhanced design options Best Appearance and precision Small volume orders	Lower production costs Stable quality with high automation Large volume orders

More Net Shape Forged Wheel Projects Are Coming

14 net shape forged wheels are in mass production. 63 are under development.

SAI

DODGE

Charger, Challenger, Durango SRT series
10 wheels are in mass production 、 1
wheel is under development

2021MY M3 M4 Competition
4 wheels are in mass
production

2024MY Macan and 2025MY 911
62 wheels are under development

2-2 Increase Profitability by Using Recycled Aluminum

Achieve diversification of supply sources, reduce inventory and cost

We Help Automakers Accelerate Their Carbon Neutrality Goals

The use of recycle aluminum can reduce emissions by up to 95% compared to primary aluminum

- Automakers apply more recycled aluminum

BMW requires suppliers to use more than 50% of recycled aluminum by 2025; JLR increases the proportion of recycled aluminum used, which can reduce the carbon emissions of the production process by 26% within a few years. Audi, Toyota, and VW have all launched plans to use recycled aluminum.

Year of Caron Neutrality	Automakers
2030	Porsche, Bentley
2035	Toyota
2039	Daimler, JLR
2040	GM, Volvo
2045	Hyundai
2050	VW, Audi, Ford, RR, Nissan

- The carbon emissions of SAI’s recycle aluminum are much lower than those of Emirates Global Aluminium (EGA) primary aluminum

Carbon emissions generated in aluminum production per ton

95%

SAI recycle aluminum : 0.32 (kg CO2e/kg of Al)

EGA’s primary aluminum: 11.9 (kg CO2e/kg of Al)

MOVING INTO GREEN

Green Milestone

- The yield rate of RESAICAL® recycled aluminum increased from 69% in 2020 to 97% in 2023.
- Our current recycled aluminum annual capacity is 40k tons and new production capacity will continue to be built.
- Usage of RESAICAL® recycled aluminum is currently maintained at **30%** of total production, with a target of **50%** in 2024.

Usage of RESAICAL®

asi Aluminium
Stewardship
Initiative

SAI is in the process of being certified as a **Performance Standard ASI supplier** and will be certified by 2024.

1.5MW

self-consumption solar power
plant (since 2023/3/31)

03 Sustainability And Corporate Governance

Sustainable Operation and Growth

Profitability Improvement and Sustainable Revenue Growth

Target to list on TWSE during 2Q24

Green Factory

- Increase the proportion of recycled aluminum used
- Increase utilization rate

Growing TAM

- Full-Machining, Net-Shape Forged Wheels & Others to increase market share
- Increase brand penetration rate
- **Expanding into the semiconductor industry** *NEW!*

Profitability Improvement

- Optimize operational efficiency
- Long-term operating margin target: 15-20%

Sustainable Return

- Generating a sustainable double-digit ROE
- Maintain at least 50% payout ratio

Independent Directors Reached 40% of Board Seats; Two Female Directors In The Board

Diverse board members to continuously optimize operation and corporate governance

Independent directors

Cheng, Ming-Siou

Specialty: Law

- Independent director, Celxpert Energy
- Distinguished Professor, Department of Law, Soochow University

Liou, Wan-Yu

Specialty: Carbon credit, Sustainability

- Independent Director, Lion Travel
- Distinguished Professor, College of Agriculture and Natural Resource, National Chung Hsing University
- Review Committee Member, Ministry of Science and Technology, Executive Yuan

Cheng, Ting-Wang

Specialty: Accounting & Taxation

- Member of the Auditing Standards Board, Accounting Research and Development Foundation
- Chair Professor, Department of Accounting, National Chengchi University
